IEEE International Conference on CLUSTER COMPUTING H O N G K O N G

From Clusters to the Fabric: The Job Management Perspective

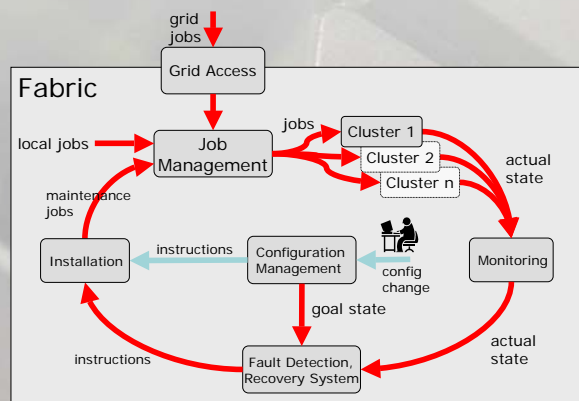

T. Röblitz, F. Schintke, A. Reinefeld, Zuse Institute Berlin, Germany

Integrating large heterogeneous clusters into the Grid requires

- support for **automated maintenance**,
- **consistent** job management, and
- support for **advanced scheduling** strategies.

Automated maintenance cycle

Developed within EDG "WP4 - Fabric Management".

Resource Management Virtualization

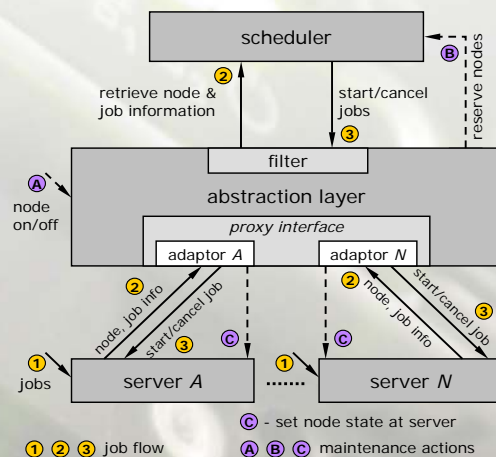

N resource mgmt. systems,
 M schedulers

$N \times M$ adaptations
+ efficient
- adaptation effort
- non-flexible (specific)

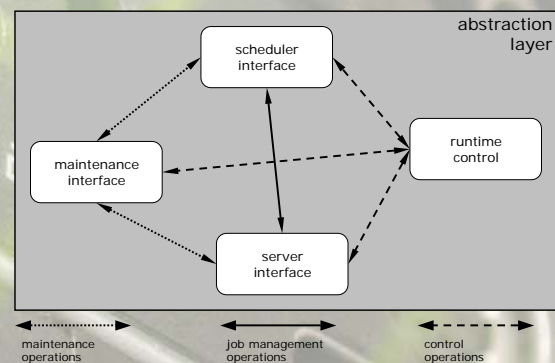

$N + M$ adaptations
- less efficient
+ adaptation effort
+ flexible, info. filtering

Architecture and Control Flow

Implementation and Performance

Components of the abstraction layer

Performance measurements
