Sponsored by the IEEE Computer Society, through the
IEEE Task Force on Cluster Computing (TFCC)

CALL FOR PARTICIPATION

IWCC is an international meeting on Cluster Computing and will serve as a forum to present the latest work by international researchers and developers as well as highlight activities in this area around Asia Pacific Rim. The IWCC'99 program comprises of keynote talks, invited talks from industries, regular sessions, poster session, and also a panel on "*Cluster Computing R & D in Australia*". The details on the program organisation and schedule can be found at the workshop web site.

Plenary Speaker

Thomas L. Sterling (California Institute of Technology)

Keynote Speakers

Kai Hwang, (University of Southern California)

Fault-Tolerant Cluster Architecture for Business and Scientific Applications

Anthony Skjellum (MPI Software Technology Inc.)

Clustering for Research and Production Scale, Parallel and Distributed Computing

David Abramson (Monash University)

From PC Clusters to a Global Computational Grid

Regular Sessions

- Cluster Setup and Performance Measurement
- Cluster Communications Software and Protocols
- Network Communication Optimisations
- Cluster File Systems and Parallel I/O
- Scheduling Programs on Clusters
- Cluster Management and Metacomputing
- Cluster Operating Systems and Monitoring
- Cluster Programming and Analysis Models
- Algorithms and Applications

Industry/Invited Talks

- Sun Cluster Architecture: A White Paper
- HP Hyperplex Clustering Technology
- Compaq's Directions towards Scalable Supercomputing
- Computational Astrophysics on Superclusters
